---

Elaine,

According to our database, Phoenix has a new UIC permit (Permit No. WY21148-07832) for the Rolff Lake #4-01 injection well. The API no. for that well is 049-013-06607. Per our database, that well is not yet active, but has a permit issued. Linda Bowling (x.6254) was the UIC permit writer, I think. Their permit application should have some chemical information concerning the water quality of the injected fluid. If needed, I could obtain the UIC permit application file and our permit.

Subject: Phoenix Production UIC permit?

---

Nathan, do you know if Phoenix Production Company (Sheldon Dome Field) submitted a UIC permit for secondary recovery through injection of produced water? They indicated that they were scoping to implement this during their last NPDES permit term -

Thanks for any insight here -  
Elaine
